

THERAPINA

“Feeling good” every day is what we call “good health.”

Revolutionary massage chairs with artificial intelligence & communication network.

Established in 1962, Family Inada has an accumulated experience of 57 years in pure play Massage chairs business. We have prided ourselves on being one of the oldest & leading Japanese manufacturers in Massage Chairs, which contributes a major segment in Health & Lifestyle industry today.

Stress is becoming a part of everyday lifestyle. Inada's focus is to reduce stress and support the "Health" of each & every person through its uniquely designed massage chairs.

The future of Healthcare has just begun!

Company Name:
FAMILY INADA CO., LTD.
President & Founder:
Nichimu Inada
Date of Establishment:
March 1962

Therapina HCP LPN9000D

An Artificial Intelligence system that knows every detail of the person.

Therapina LPN9000D is enabled with an “Automatic Adjust-Sensor Search Shiatsu Point System”, which identifies each and every shiatsu point of the body. Shiatsu points differ for every individual depending on their body types. Once the structure of the body is defined in detail, the rollers are automatically adjusted for accurate massage movements.

STEP 1

Detection of Shiatsu Points

STEP 2

Skeleton Detection

STEP 3

Detection of muscle shape and size

‘Artificial Intelligence’ mechanism that matches your muscle condition at that very moment. Stiffness and fatigue is variable for every individual according to their schedules. Therefore, the artificial intelligence mechanism adjusts the roller movements to optimum strength and duration as per the muscle shape, size & stiffness at that given time. The roller speed is adjusted according to the motor signals received, depending on the load of the rollers.

Massaging broadly, holding and pressing deeply. Realizing a program based on professional theory.

* Image of measurements of a pro-like massage by the artificial intelligence mechanism with an oscilloscope

STEP 4

Detection of Hardness by Muscle Fatigue

For best results, it is very important to massage regularly for muscle conditions to induce relaxation and reduce pain.

A new form of health management by Communication Network.

1. Health Data Management

The tablet allows you to manage your blood pressure, weight and pulse every day. In case of notable changes, the tablet notifies you with text, light and sound.

First in the Industry! INADA Healthcare NAVI.

2. Monthly Health Check for Family

By answering approximately 50 questions, Therapina examines your health conditions in combination of your health data including blood pressure, weight and pulse. Based on the health check results, Therapina offers personalized advice on each family member's lifestyle.

First in the Industry! INADA Healthcare NAVI.

3. Estimated Visceral Fat (Metabolic Score)

The Big Data-based "Metabolic Score" developed by HealthGrid, Inc. allows you to find out your visceral & subcutaneous fat conditions from the height and arm thickness data.

INADA Healthcare NAVI - Support User's Health Utilizing Big Data.

4. Online Version Upgrade

The Family Inada's latest programs developed with the professionals will be delivered to you regularly. You will be able to enjoy the latest massage programs at all time.

INADA Healthcare NAVI - Keeps Your Massage Programs Updated.

5. Access to Health Information

Using the tablet, you can access the latest healthcare information delivered from Family Inada, which contains useful information on your daily health management from the perspectives of preventive medicine.

INADA Healthcare NAVI - Delivers Health Information.

Sessions & Selection

Main Session:

Individual Sessions designed for alleviating muscle fatigue – Choose a session that best suits your needs.

Professional - This course closely resembles the techniques of **Dr. Hideyo Matsuura**, a leading expert who has played an active role in acupuncture for over 40 years. This Session delivers the same massage techniques of professionals such as acupuncturists and chiropractors. The session is updated regularly. You can enjoy different massage techniques without becoming tired of the same one.

Relaxation course - This session is designed for you to massage every day. Choose your favourite scenery, music, and narration. Enjoy soothing images, music and narration. Just relax and enjoy the massage.

Soft - This session delivers soft massage to alleviate your fatigue. Light and rhythmical stimulation will help refresh the entire body.

De-Stress - In this session, Therapina measures your level of stress by analysing your parasympathetic function. By incorporating breathing techniques into the massage therapy, this session is designed to active your parasympathetic function and relieve your stress. You can compare your stress index before and after the massage.

Concentration-Up - Developed collaboratively with Tottori University, this session is designed for young people to improve their ability to concentrate.

Stretch/Posture Adjustment - This Session was developed under the supervision of Professor Koji Kaneoka, Waseda University. It is designed to correct poor posture that is common to many people today. Correcting poor posture will make you healthier physically and mentally.

Weight Challenge - You will receive advice on achieving an appropriate BMI in this session. You can work on your weight to reach the healthy BMI level by following the advice. This session also comes with a massage therapy for relaxation.

Quick - This seven-minute session is perfect for busy people and those who want to enjoy quick massage. It is designed to stimulate your sympathetic function and help you regain power in seven minutes.

Healthcare Session:

Standard session designed for alleviating muscle fatigue.

Full Body - You can enjoy full body massage from head to toe. This session is recommended for getting rid of fatigue at the end of the day and perfect for your daily health management.

Medical - This is a session designed to revive you from fatigue and refresh yourself by promoting blood circulation and improving your metabolism through full body massage.

Focus Sessions - Pick and mix your favourite menus - Neck/Shoulder, Back/Lower Back, Arms/Hands, Legs. Shiatsu point locator is available for Neck/Shoulder and Back/Lower Back only. For any other area, the massage session starts by selecting a menu.

Weight challenge course

A course that challenges you to manage your weight while receiving advice to reach your goal.
* For measuring weight, optional external equipment is necessary.

Health check by symptom

Select a symptom that you are concerned about and answer the questions so that health advice and the recommended massage course are displayed.

Dementia check & training program

Questions to check for dementia are displayed and brain training is available.

Receiving health information

The latest medical information useful for daily health management is delivered from the perspective of preventive medicine.
* Medical data and medical research data from clinics, universities, and big data companies are provided.

Utilizing big data

Data utilization is planned for the development of programs that match people's needs, maintenance, and malfunction analysis by collecting and analyzing THERAPINA's operating status.

Global User Testimonials

My Inada Therapina massage chair was delivered to me in June 2018. Very professional & excellent customer service. Absolutely divine to sit on, true to their words, a true blue massage chair!! It was totally relaxing and in 15 minutes of time, i fell asleep. It was energising and will definitely recommend the same to family & friends. Now i don't need to see a Chiro, Physio or a massage therapist. All in one can have it to myself at any given point of time. Worth buy to pamper your health and well being!

- Rob Jolan

My Husband & I were looking for a massage chair for a long time. We bought Therapina for convenience. Very comfortable! We use it everyday! And looks great in my living room. Bonus: Japanese Brand.

- Sandra Lauren

Great quality massage chair. A million functions to choose from. Prompt delivery! Highly Recommend this chair, the stretching program is so amazing! I feel my posture is better than before, even my son agrees. Totally worth the investment made.

- Norah Jones

Amazing! This is even better than i had expected - the stretch is inline with any other massage chair, it really works and feel less hunched than i have felt in years. The feeling is fantastic & relaxing.

- Craig Cullen
